- Experience building technical architecture and implementing product features

Thai On

- M.S. Computer Science, Columbia University
- Background in operations, partnerships, software engineering, and AI research
- Experience deploying products, go-to-market planning, outreach, and team coordination

Young Travelers want shared Experiences...

~5 trips/year
taken by Millennials
& Gen Z in 2023

42% GenZ
travel to spend
time with friends

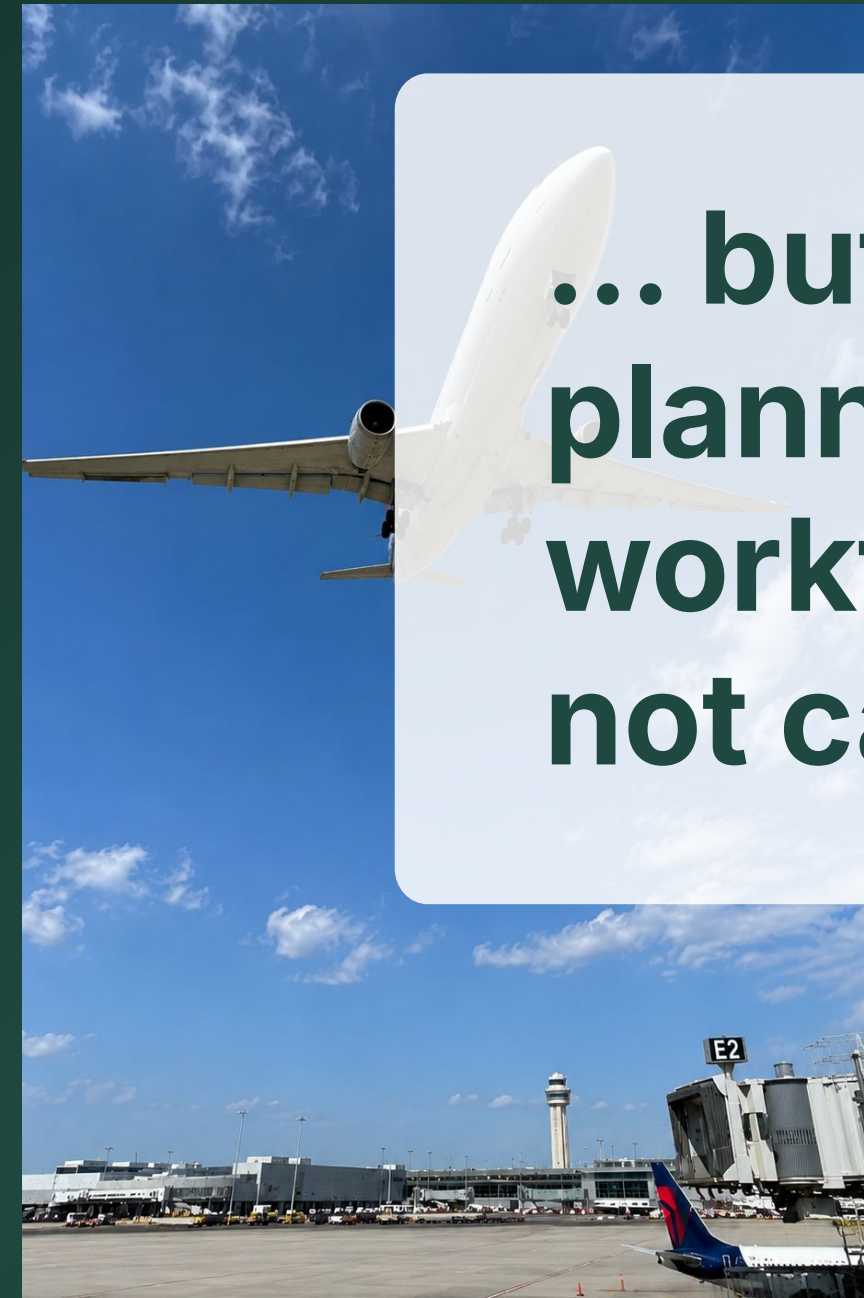

40% Millennials
plan a group trip
in next 12 months

66% travelers
more interested in
travel than
pre-COVID

**... but the
planning
workflow has
not caught up.**

Why Now?

**Group Travel
is Rebounding**

**Group Travel
planning is still
fragmented**

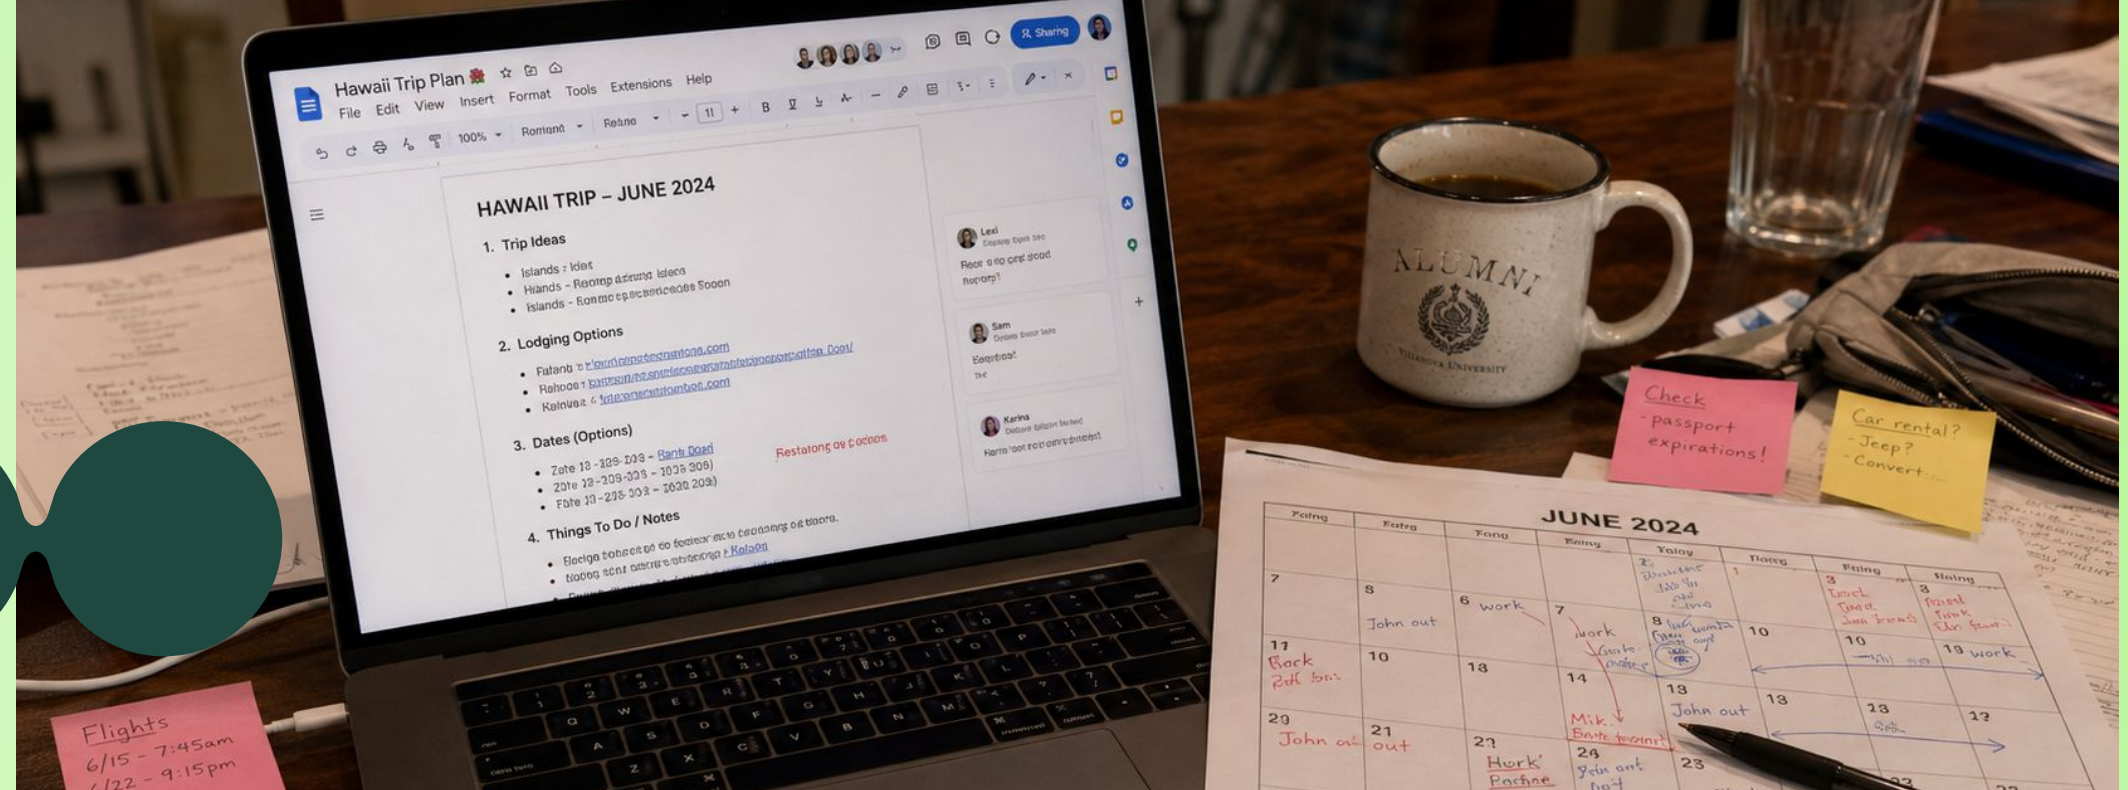

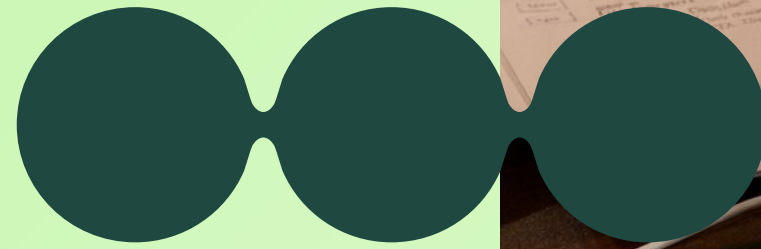

**Collaboration
behavior is now
normal**

**The market is not waiting for another itinerary app.
It is waiting for a group coordination layer.**

Problem

- Links disappear in the messages
- 1 person becomes the unpaid travel agent
- Schedules are hard to align
- Expenses left an afterthought

"The group chat becomes chaos once everyone starts sending Airbnb links."
- Tripable Interviewee

The group
chat was
never built
to plan a trip.

Target Customer

Primary Users:

College Students

18-24 yrs

- Weekend trips, breaks, post-semester travel
- Coordinate in group chats
- Every trip invites more users

Secondary Users:

Young Professionals

25-30 yrs

- Weekend trips, weddings, reunions, overseas trips
- Higher disposable income
- Willing to pay for convenience

Defining Behavior

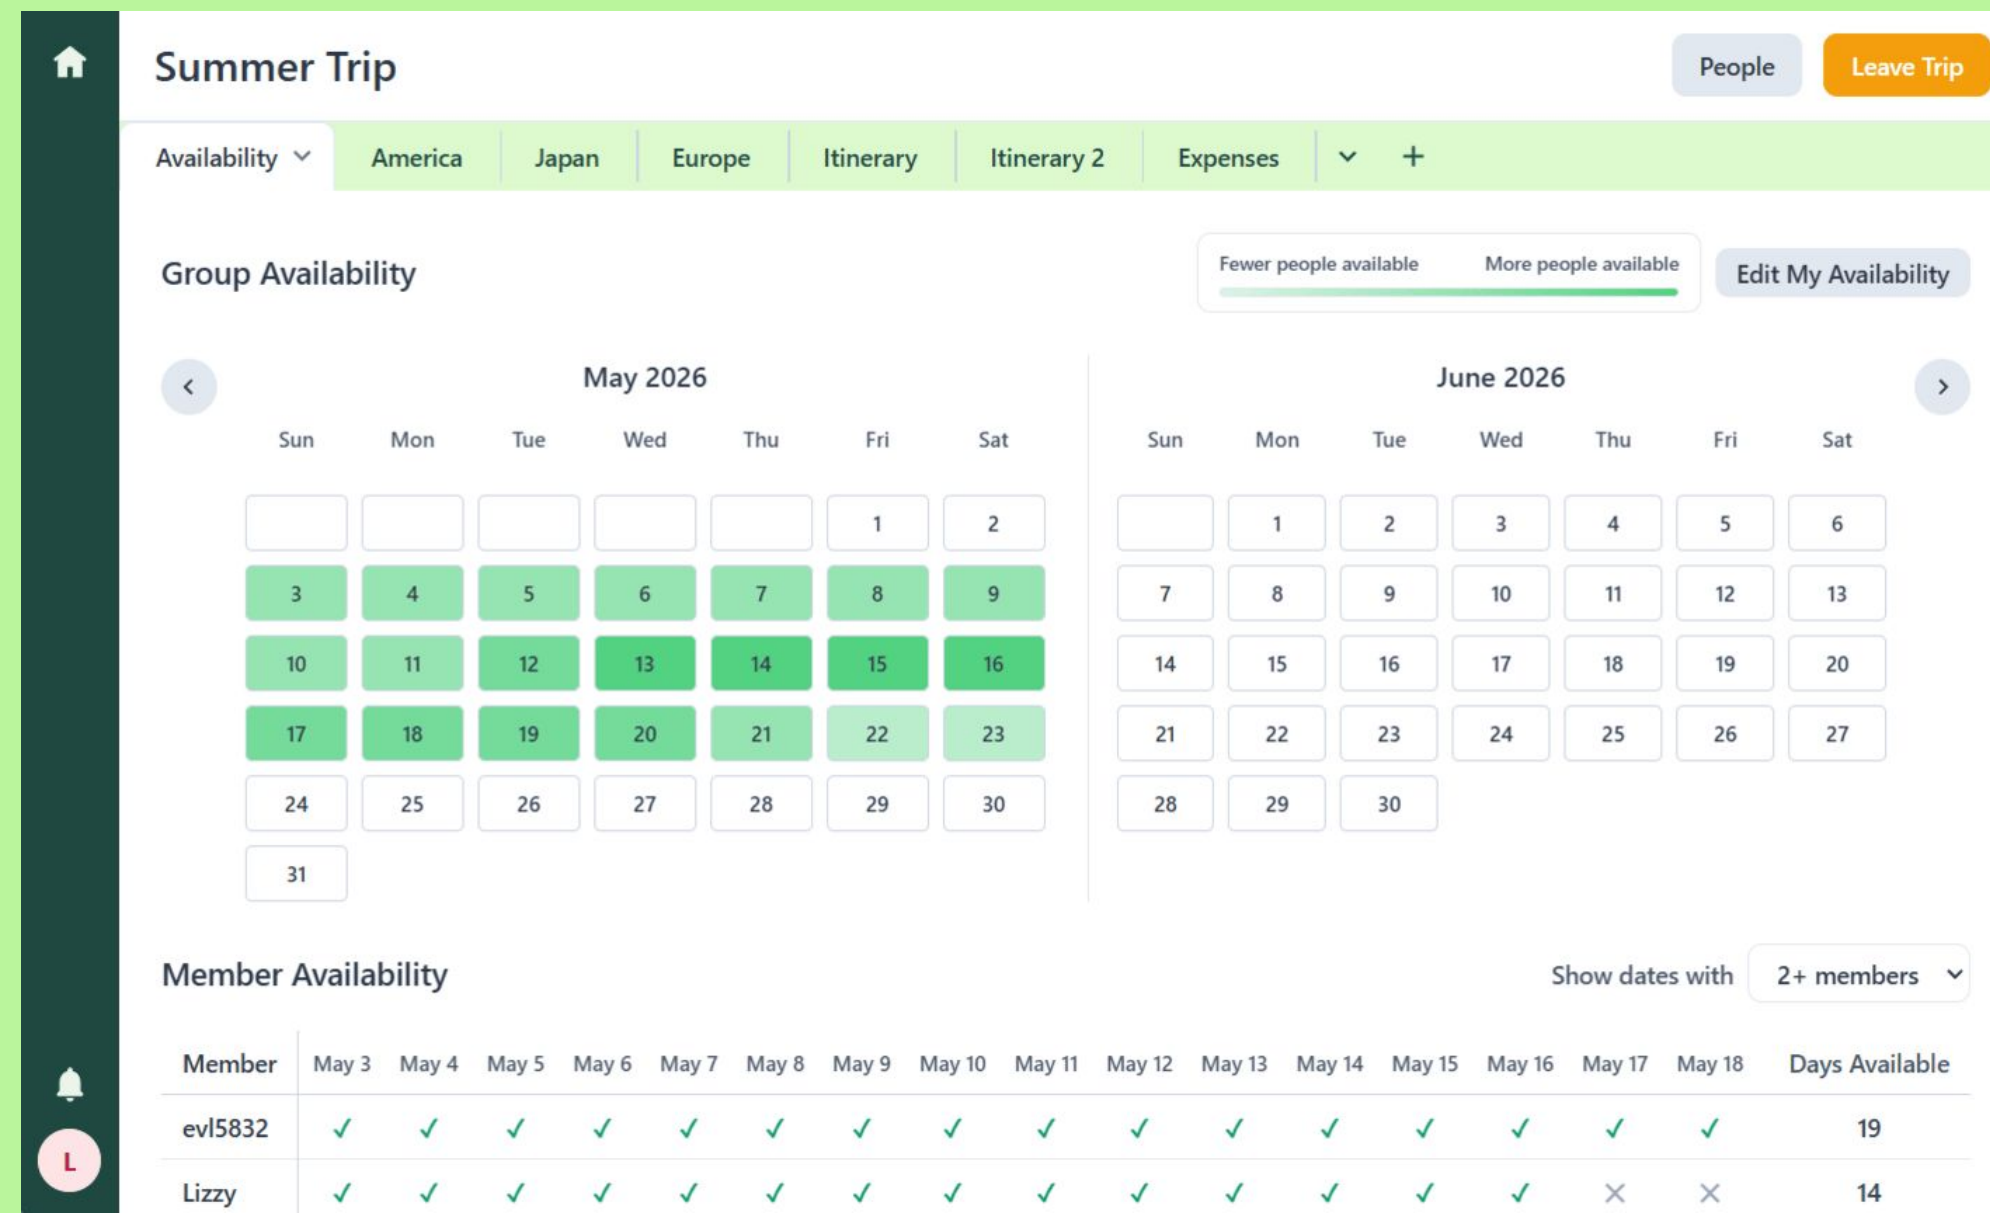

Planned a group trip

OR

Watched a friend do all the planning

Track Expenses

Competitor Analysis

Our Wedge

- Group-native
- Decisions and votes are part of the workflow
- Designed for participation and organization

Competition

Tool	What it does	Why it breaks for group trips
Messaging Apps	Conversation	No structure
Google Docs/Sheets	Shared Notes	Manual planning, no functionalities
Doodle/When2Meet	Availability	Scheduling only
Splitwise	Expenses	Tracking spending only
Wanderlog/TripIt	Itinerary	Solo traveler first, no group decision making
Tripable	End-to-end Group Workflow	Collaborative trip planner

Validation

47

User Interviews

100%

Described group trip
planning as
"messy" or "slow"

78%

Would adopt a
dedicated app

3

Pilot groups actively
testing prototype

"Planning the trip is harder than
the trip itself."

- Graduate student, NYU

"Someone always ends up doing
all the planning and resenting
everyone for it."

- Undergraduate, Columbia

Business Model

Freemium entry. Premium planning when the trip gets serious.

Free

- basic availability
- basic voting
- basic itinerary
- basic expense tracking
- 2 free trips

Premium

\$4.99 / month or \$9.99 / trip

- AI itinerary
- unlimited number of owned + shared trips
- budget planning
- itinerary export

Go-To-Market Strategy

Phase 1

- Launch on 5 campuses
- Student orgs, travel clubs, Greek life
- 1 student ambassador per university

Phase 2

- Every trip invites non-users
- Referral credits for completed trips
- 50 campuses
- Targeting young professionals

Phase 3

- Affiliate partnerships
- Travel agencies and group travel coordinators
- International expansion
