Evidence of Life

Your personal life OS.

Capture, reflect, and rediscover your days.

Demo Day 2026 · August Fan Club

The way we remember our lives has broken.

10,000+ photos.

Can't describe last Tuesday.

THE PROBLEM

Life is happening. Memory is failing.

Capture without context

Photos pile up with no meaning.

Tools that feel like work

Most people quit journaling in two weeks.

No reflection layer

Nothing connects what, how, and where.

WHY NOW

Three forces converging.

01 AI is ready

LLMs classify moods and tag content at near-zero cost.

02 Self-reflection is mainstream

Journaling market grows ~20% YoY. Gen Z tracks everything.

03 Digital amnesia is real

Outsourcing memory to devices reduces recall. People notice.

OUR SOLUTION

Evidence of Life

Effortless capture. AI reflection. Rediscovery on demand.

CAPTURE

Log a moment in under 10 seconds.

REFLECT

AI tags moods and surfaces patterns.

REDISCOVER

Map, calendar, chat. Ask and get answers.

THE PRODUCT

Live demo.
