

Recruitr

Sports never had a talent problem.
It had a visibility problem.

DEMO DAY · May 12, 2026

**Every athlete has a camera
in their pocket. None of them
have a direct line to the coaches
who need to see them.**

The athletes who get opportunities aren't the best.
They're the most connected.

*That's a system-wide problem, and it
compounds at every level.*

THE PROBLEM

Talent discovery is broken at every level.

*We get 250 recruiting emails a day.
We watch maybe 1–2 players in full.*

— Tobias Esche, Assistant Coach, Columbia University Men's Soccer

Coaches are drowning. Athletes are invisible.
Film goes to YouTube and dies.

THE TEAM

Why us, for this.

IT Engineer @ Columbia Tech
Ventures
CS @ Columbia
Golfer

Benjamin Sidley

Co-founder, Growth

Division 1 Athlete
CS @ Columbia
Data Analytics @ Stone Street

WHY NOW

There isn't a better time to build this.

01

Athletes already film everything

Video-first is the default. Every athlete has a highlight reel on their phone.

02

Social Media + NIL + transfer portal blew the market open

Recruiting is not just high school → college → pro. It's every level, every direction.

03

Camps and networks can't scale

Coaches need digital discovery tools. The old system tops out.

THE SOLUTION

Athletes build video profiles. Coaches discover them.

A ranked feed surfaces athletes by sport, position, and fit. Verified coaches search, shortlist, and message directly.

One platform replaces highlight tapes, cold emails, spreadsheets, and guesswork.

1. DISCOVER ATHLETES

Scroll the highlight feed like a recruiting board

Coaches browse vertical athlete clips, search the ecosystem, and keep key actions one tap away.

Explore

1

Watch real highlight clips

2

Use engagement signals

3

Search athletes, schools, teams

BUSINESS MODEL

How the money works.

Who pays?

Coaches and programs. Athletes join for free

Pricing

SaaS: search, shortlists, messaging, workflow

Per seat

\$200 / month per program, billed annually

Gross margin

80%+ software margins

COMPETITIVE LANDSCAPE

What exists today and what's missing.

NCSA / Hudl

Database, not social. No two-sided discovery.

FieldLevel

College-only. No mobile-first experience.

YouTube / Twitter

No structure. Film dies in the feed.

Spreadsheets + email

The real competitor. Doesn't scale.

Recruitr's wedge

- ✓ Interactive social product
- ✓ Two-sided marketplace
- ✓ Verified coach trust model
- ✓ All levels, all sports
- ✓ Workflow tools that replace spreadsheets

THE ASK

\$100k pre-seed

- Deploys to: native mobile app, coach acquisition, athlete seeding
 - Milestones: production recruiting loop, 50 paying coach accounts
 - Runway: 18 months
-
